Edenton is a community located within Chowan County on Albemarle Sound in northeastern North Carolina. The two communities contracted with CodeWright to prepare a joint CAMA Land Use Plan update in September 2016.

The project included data updates, new population projections, and existing land use surveys for the Town and the County. CodeWright then conducted a series of meetings with the community and collected a series of 310 visioning surveys. Based on the public input, CodeWright prepared revisions to the vision statements, goals, future land use maps, and implementation plans for both communities.

The joint plan was adopted by both communities in August of 2018 and certified by the NC Department of Coastal Management in November of 2015.

Chowan County Land Use Visioning Survey

Think about the different ways that land is used. How would you describe the amount of each land use in CHOWAN COUNTY today?
